SKILLS

- HTML & CSS
- Basic JavaScript
- Android Studio
- UI / UX Basics
- AI-Assisted Coding
- Prompt Writing
- Debugging with AI
- Website Customization
- Frontend Layouts
- App Screens & UI
- Learning APIs
- Automation Concepts

PERSONAL STATEMENT

Motivated and fast-learning technology student with practical exposure to web development, Android app development, UI design, and AI-assisted coding. Currently at an early learning stage with FSc result awaited and plans to continue higher studies in Computer Science. I am looking for an internship or junior learning opportunity where I can assist with practical tasks, improve my technical skills, and work under senior guidance.

PROJECT EXPERIENCE

Website Development

- Created and customized website pages with clean structure, sections, and frontend layouts.
- Worked on landing pages, product-style pages, navigation sections, and basic design improvements.
- Used AI tools to generate code drafts, understand errors, and improve UI quality.

Android App Development

- Built practice mobile app screens using Android Studio and app-building tools.
- Worked on buttons, layouts, simple logic, and user flow.
- Gained practical exposure to the app publishing and release process.

AI-Assisted Development

- Used AI tools for prompt writing, code support, debugging, project planning, and learning.
- Focused on understanding AI-generated code rather than only copying it.
- Exploring how AI can support automation workflows and practical software tasks.

EDUCATION

FSc – Result Awaited

Planning to continue higher studies in Computer Science.

Current Focus

AI-assisted development, web/app projects, Android development, and automation learning.

CERTIFICATIONS

- **NITSEP** – Certificate of Completion: Full Stack Web Engineer in 1 Year.
- **Youth Skills Development Program** – Certificate of Course Completion: Introduction to Computer Software and Digital Skills, Agribusiness and Leadership.

WHAT I CAN ASSIST WITH

- Frontend page layouts and website customization.
- App screens, basic UI design, and simple logic support.
- AI-assisted coding, debugging support, and project research.
